DETAILED ACTION

Drawings

The drawings have been reviewed and accepted as formal drawings by the Examiner.

Specification

1. This application does not contain an abstract of the disclosure as required by 37 CFR 1.72(b). An abstract on a separate sheet is required.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 1, 3, 4, 10, 12-14, 16, 17, 23, 25 and 26 rejected under 35 U.S.C. 102(b) as being anticipated by Scott.

In regard to claims 1 and 14, the Scott reference discloses a "sealing apparatus" (see Fig. 1) comprising a "container" 20, an "extraction unit" 10, a "gas inlet" 14, a "gas outlet" 26; and inasmuch structure that is defined by a "standing surface" for supporting the unit on a support surface, the topside of housing 12 meets the claimed limitation.

In regard to claims 3 and 16, "container" 20 has a "bottleneck" 38 and "unit" 10 has a "connection stub" 18.

In regard to claims 4 and 17, "unit" 10 has an "inlet duct" 22 and an "outlet duct" 24, as claimed.

Art Unit: 3751

In regard to claims 10 and 23, see "filling line" 52 in Figure 1.

In regard to claims 12 and 25, "container" 20 is commonly known aerosol can having a "standing surface" defined by the can's bottom end.

In regard to claims 13 and 26, see column 3, lines 26-28.

Claim Rejections - 35 USC § 103

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

5. Claims 2 and 15 are rejected under 35 U.S.C. 103(a) as being unpatentable over Scott.

Scott discloses the invention as claimed (discussed supra), but does not disclose the container and extraction unit being made of a plastic material. However, it would have been obvious to one having ordinary skill in the art at the time the invention was made to make the Scott device of a plastic material, since it has been held to be within the general skill of a worker in the art to select a known material on the basis of its suitability for the intended use as a matter of obvious design choice. *In re Leshin*, 125 USPQ 416

Allowable Subject Matter

6. Claims 5-9, 11, 18-22 and 24 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Conclusion

7. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The Sperberg, Savidge and Paasch et al. references pertain to various pressurized liquid delivery devices, similar to Applicant's device.
